September 20, 2021

Dear Parents, Students and Staff,

We were informed today that a student at YWCP has tested positive for COVID-19. We believe that this student contracted COVID-19 outside of school, and we are confident that this student did not contract the virus in school. In addition, the Monroe County Department of Health is quarantining the student and their family. No additional actions are required on behalf of our school.

We have contacted any families impacted by this on an individual basis to inform them that they may have had **close contact** with the infected student. The Monroe County Department of Public Health's criteria for close contact is being within 6ft of distance for 15+ minutes AND one or both individuals were unmasked during this period. We've conducted contact tracing and strongly believe that no other students or staff have been impacted by this student based on our school mitigation measures following the COVID-19 guidelines and our on-campus surveillance testing. Currently the Department of Health is making follow up contact calls within 24-72 hours. If the Department of Health indicates further action is needed at the school level, we will communicate that directly with you.

I recognize that this news will be concerning to some of our students and families. We ask that medical questions be directed to your family doctor/healthcare provider. Administrators are currently available through email to address your school questions and concerns.

Please continue masking, physical distancing and practicing good hand hygiene. By reinforcing these habits at home, school, and in the community we can work together to help contain the spread and keep our school community safe.

Sincerely,

YWCP Administration
